AVIATION CAPITAL

Hourly Cost Maintenance Programs to stabilize maintenance budgets, maximize aircraft availability, and enhance residual value.

Flexible Programs & Coverage: Engine I APU I Airframe I Tip-to-Tail®

Dedicated team of product line managers & procurement specialists who leverage our inventory and global buying power to solve your parts need. PartsHub, the latest platform, unlocks the power of JSSI Parts & Leasing online.

Independent advice, project management, and event oversight from our global technical team and ASA-accredited appraisers.

Customized asset-based financing solutions and structures to match your needs; JSSI Aviation Capital provides options to traditional lending.

TRAXXALL **SYSTEM & SUPPORT** OVERVIEW

Access Traxxall from all your devices

The Traxxall suite of solutions was built to suit the demands of the modern flight department,

Users

with a set of robust and highly configurable tools to streamline maintenance workflows, reduce aircraft downtime, maintain data integrity and accuracy, and provide key insights into your operation.

Traxxall is backed by a team of expert aircraft maintenance analysts that act as an extension of your flight department - providing 24/7 system support, ongoing compliance management, and record keeping.

TRAXXALL MAINTENANCE TRACKING

Advanced tracking software with robust reporting capabilities and dedicated, expert technical support. Designed for corporate flight departments, charter operations, and management companies, Traxxall provides enterprise-level functionality with maintenance teams in mind.

TRAXXALL MAINTENANCE TRACKING TRAXXALL USER DGS Planned Pendina INV MTS Dashboard Work Plan Due List Status 16-Jan 17-Jan 18-Jan 19-Jan 20-Jan 21-Jan 22-Jan 23-Jan 24-Jan Holding Area 51 Wed Thu Fri Sat Mon Tue Tue Wed Work Planner 16-Jan 17-Jan 18-Jan 19-Jan 20-Jan 21-Jan 22-Jan 23-Jan 24-Jan Tue Wed Thu Fri Sat Sun Mon Tue Wed Fleet History & Utilizations 16-Jan 17-Jan 18-Jan 19-Jan 20-Jan 21-Jan 22-Jan 2 Wed Thu Fri Sat Sun Mon Tue

Master Cores

The backbone of the Traxxall platform is our extensive library of master core templates, based on the requirements from airframe, engine, and APU OEMs, as well as local authorities. Our master cores are maintained by a team of expert analysts to ensure you are always tracking the most up-to-date requirements on inspections, components, ADs, and SBs.

Aircraft & Fleet Dashboards

The Traxxall Dashboards, for both single aircraft and fleet, provide instant visibility into the status of your aircraft and operation. Easily view upcoming maintenance, open discrepancies / MELs, workplans, and aircraft utilizations from your computer or mobile device.

& Electronic Workflow

itional paper-based record keeping, the Traxxall eSignature and Electronic you to sign-off maintenance in real-time, streamlining the return to service records, all in accordance with regulatory authorities.

Discrepancies & MELs

Streamline the process of managing unscheduled maintenance with the Traxxall mobile application. Your maintenance team and crew members can easily report and manage discrepancies, MELs, and NEFs, and watch list items in real-time - eliminating the need for paper tech logs.

Work Plans

Used for both small and large maintenance events, users can easily build and manage work orders based off scheduled or unscheduled maintenance. Fully integrated with our Inventory Management module, our Work Plans give you the ability to plan events, assign tasks, request / assign parts, and sign-off tasks, all from one intuitive view.

Checklists

Fully customizable to meet the needs of your operation, Traxxall Checklists provide users with a simple, yet powerful way to manage both maintenance and operational processes, allowing you to build checklist templates, track progress, and collect data points along the sign-off process.

Document Management

Whether you want quick access to operational manuals or a backup of your historical records, Traxxall's document management module provides a safe and secure place to store your digital files.

Logbook Entries

Following the completion of maintenance, users can easily generate logbook entries in PDF or Microsoft Word with a number of options for layout based on user preference.

TRAXXALL INVENTORY MANAGER

Fully integrated with Traxxall Maintenance Tracking, our inventory and material management system provides you with the tools you need to track components throughout the full lifecycle of each part.

Dashboard

The Traxxall Inventory Manager dashboard provides users with instant visibility into the inventory and purchasing activities that matter the most. Easily view expiring inventory, minimum and maximum stock levels, open parts requests, active orders, and more.

Inventory Management

Traxxall Inventory Manager gives operators an easy-to-use, yet robust set of tools to manage the movement of parts throughout your operation. Manage key details around part types, conditions, locations, vendors, expirations, core returns, and much more.

Training

Maintain compliance and stay on top of initial and recurring certifications, trainings, classes, and more for your entire organization.

Orders

The Traxxall Orders module delivers an integrated solution for managing transactions with third-party vendors, including purchase orders and in-depth repair, shipping, and core exchange capabilities for tracking the movement of parts outside of your operation.

Maintenance Integration

Traxxall Inventory Manager is fully integrated with Traxxall Maintenance Tracking and work plans, giving users the ability to request parts from a work plan, allocate parts to a job, and track the movement of parts on and off of each aircraft in your fleet.

TRAXXALL **MRO MANAGER**

Built on the foundation of our comprehensive maintenance tracking software, Traxxall MRO Manager provides 145 operators with a fully integrated and powerful solution for managing their fleet and ongoing projects all in one place: from resource allocation to labor costs, material management, and invoice generation.

MRO to MTS Integration

For aircraft that are currently enrolled in Traxxall MTS, you can easily sync work plans, inventory, and compliance data between the two modules - eliminating the need for duplicating work in multiple systems.

Estimates

Instantly build estimates for upcoming jobs with customizable pricing profiles based on your contracts and discount models.

Labor Tracking

Easily assign tasks to your team and track labor times and costs across scheduled and unscheduled maintenance events.

Master Core Templates

For 3rd party aircraft, you can utilize Traxxall's Master Core templates to streamline the work order creation process and maintain the same shop floor processes regardless of the aircraft's maintenance tracking system.

Invoicing

Once the work is completed, you can instantly create invoices for all work performed, with the flexibility to manage pricing based on your preferences.

Hangar Management

The Hangar Management feature is exclusive to Traxxall's MRO Manager. Within the settings you can customize the view for each of your hangars to include how many workstations (i.e. bays) you have, special terms and conditions per hangar, etc.

Reporting

Traxxall was built to deliver the data you require - when and how you need it - with a full selection of pre-canned reports and the ability to fully customize reports, either in PDF or Excel formats.

PORTSIDE 000

Aircraft Maintenance Analysts

We view Traxxall as an extension of your flight department, and our analyst team is composed of A&Ps, IAs, military veterans, and industry professionals, focused on data accuracy and keeping our customers in compliance. Our team is available 24/7 with rapid response times and in-depth knowledge of our system.

Training

The Traxxall training team is dedicated to bringing you and your team up to speed on the Traxxall system and all of the tools available to improve your operational efficiencies. We deploy our trainers after aircraft activation and have scheduled weekly and 1:1 sessions available for recurrent training and new personnel. We have also built out a fully integrated training module within the platform with videos and step-by-step tutorials available for on-demand, real-time training on the platform.

CUSTOMER SUPPORT

ENROLLMENT

5 SIMPLE STEPS | Guided by Your Traxxall Onboarding Manager

Data Collection & Review

We review your current records and reports to ensure we have all of the necessary details needed to build your aircraft into Traxxall.

Enrollment

2

3

4

activation

from enrollment to

DAYS

0

Utilizing proprietary technology and best practices, our analysts extract the data from your records and reports to import into the Traxxall platform. An estimated activation date will be provided to your team.

Quality Review & Audit

Your data is compared to our core templates, analyzing aircraft specific data against the latest OEM maintenance schedules and requirements from local authorities. We compose a Quality Control Findings Report (QCFR), which identifies any discrepancies or questions we may have based on our analyst's review of your aircraft.

Activation

Once the audit is complete, we activate your aircraft and your maintenance analyst will set up an introductory call to discuss account configuration options that work best for your operation. We can grant varying levels of access to users in your organization.

Training

After activating your account, we will schedule training for you and your team, getting a deeper understanding of your operation, and guiding you through the features and functionality of the Traxxall platform based on your specific needs.
