Carbon Credit Matching Promotion

Jet Support Services, Inc. (“JSSI”) and Avfuel, Inc. (“Avfuel”) have agreed to match the number of carbon offset credits (the “Credits”) actually purchased by JSSI clients (or their authorized representatives, the “Participant”) for up to 10 hours of aircraft utilization (this “Promotion”). The Credit matching will be available for the operating hours which accrue during month of October, 2021. [For example, if a participant purchases Credits to offset 12 hours of aircraft utilization, the total amount of Credits which will be matched will be based on 10 hours of aircraft utilization.]

To be eligible for the Promotion, the Participant must (1) have an active and in good standing JSSI Hourly Cost Maintenance Program Contract, (2) be on-site at JSSI’s booth during the NBAA-BACE exposition, (3) be a current client of JSSI (or a representative thereof), and (4) consent to having their NBAA badge scanned for the purpose of participating in the Promotion. This Promotion will end at 12:00 PST on October 14, 2021. By consenting to having their badge scanned, the Participant consents to be contacted for the purpose of this Promotion.

JSSI and Avfuel will calculate the number of Credits based on the make/model of the aircraft, using Conklin & deDecker Associates, Inc.’s proprietary carbon credit calculator. Please contact Julie Bourke, Senior Director of Client Services & Contracts, Domestic (jbourke@jetsupport.com) with any questions regarding this Promotion.
